DOCUMENT 1 : TERMS OF SERVICE (ToS)

CENTURIS - TERMS OF SERVICE
Last Updated: March 2026

1. Acceptance of Terms
By accessing or using the Centuris platform (the "dApp"), the smart contracts, and any associated services (collectively, the "Protocol"), you agree to be bound by these Terms of Service. If you do not agree to these terms, do not use the Protocol.

2. Nature of the Protocol
Centuris is a decentralized finance (DeFi) application operating on the blockchain. The Protocol allows users to mint and burn the $TOPX index token and interact with the $CTS governance token. Centuris is a non-custodial platform. We do not have access to your funds, private keys, or wallets.

3. Assumption of Risk
You explicitly acknowledge and assume all risks associated with using the Protocol, including but not limited to:
- **Smart Contract Risk:** The underlying code may contain bugs, vulnerabilities, or errors that could result in the total loss of your funds.

- **Market Volatility:** Crypto assets are highly volatile. The value of $TOPX and $CTS can fluctuate significantly.

- **No Guarantee of Redemption:** While the $CTS token may be supported by a Treasury of Real World Assets (RWAs) or other cryptocurrencies, Centuris does not legally guarantee any buybacks, redemptions, or price floors. The Treasury operates algorithmically and at the discretion of the Protocol's governance.

4. No Financial or Legal Advice
The information provided by Centuris, including the dApp interface and documentation, does not constitute financial, investment, or legal advice. You are solely responsible for your investment decisions.

5. Limitation of Liability
To the maximum extent permitted by law, the founders, developers, and contributors of Centuris shall not be held liable for any direct, indirect, incidental, or consequential damages (including loss of profits, data, or funds) arising out of your use of, or inability to use, the Protocol.

6. Compliance with Local Laws

It is your responsibility to ensure that your use of the Protocol complies with the laws and regulations of your jurisdiction. The Protocol is not intended for use by individuals or entities in jurisdictions where such use is restricted or prohibited (including sanctioned countries).
